

# Resilience Roadmap

*A Collaborative Approach to Multi-Jurisdictional Planning*

## Activity 3: Setting Performance Goals

### Discussion Questions:

- Given the interdependencies and vulnerabilities identified, which shared infrastructure systems may likely be impacted in the next 20 to 30 years? How does the interruption to these infrastructure systems impact the multiple jurisdictions and government operations?
- Who is responsible as the owner and operator of these infrastructure systems?
- What is the current recovery time for system-wide infrastructure recovery? What are performance goals for accelerated system-wide recovery?
- What are the gaps and barriers that exist between current recovery time and the performance goal, including resources, policies, agreements, technology gaps, human capacity and system integration?

### Discussion Tool:

The following worksheet is available for facilitators to frame and record the conversation.

Resilience Planning & Strategy Development Workshop		Performance Goal During Hazard (Days, Weeks, Months)			Activity #3: Establish Shared Performance Goals		
Infrastructure Impacted	Operations & Services Impacted	Short Term (Days)			Intermediate (Weeks)	Long-Term (Months)	Gaps Between Current Performance and Goal
		0	1	1-3			

**Activity 3: Sample worksheet for facilitators (printable, full-size version on back)**

Infrastructure Impacted	Operations & Services Impacted	Short Term (Days)			Intermediate (Weeks)	Long-Term (Months)	Gaps Between Current Performance and Goal
		0	1	1-3
